### Profile

---

IT Project Manager and Product Owner with two years of experience leading digital and software development projects end-to-end. I have contributed to 35+ projects across corporate platforms, healthcare, e-commerce, real estate, and service industries, owning coordination, planning, requirement definition, and delivery while keeping business objectives and execution aligned. Founder of Insyde, an NFC- and QR-powered digital profile platform whose system I designed and built myself. Backed by over three years of front-end development experience and AI-assisted development (vibe coding) skills, I can prototype ideas, validate technical feasibility early, and communicate with engineering teams in their own language.

---

### Experience

---

#### Information Technology Project Manager

04/2026 - 08/2024

**AISTGroup** | Baku, Azerbaijan · On-site · Full-time

- Manage digital and software development projects from planning through delivery, coordinating development teams and client communication.
- Prepare functional and business requirements documents, define system logic, and ensure project goals are clearly scoped and successfully implemented.
- Work closely with clients to understand business needs, analyze and map processes, and translate requirements into clear technical documentation and user stories.
- Build rapid prototypes and clickable mock-ups with AI-assisted development (vibe coding) to validate requirements with stakeholders before development starts, reducing rework and clarification cycles.
- Support project presentations, reporting, business research, and analytics, ensuring smooth communication between stakeholders and the technical team.

#### Founder & Product Owner

01/2026 - Present

**Insyde** | Baku, Azerbaijan · Hybrid · Self-employed

- Founded Insyde, an NFC- and QR-powered digital profile and business presentation platform, and personally designed and built the underlying system.
- Defined product vision, business strategy, and platform roadmap, managing end-to-end product development from concept to launch.
- Developed the platform using AI-assisted development (vibe coding), moving from idea to working product at speed as a one-person product and delivery owner.
- Coordinated designers, developers, and external stakeholders throughout the project lifecycle.
- Led market research, requirement gathering, and feature prioritization, designing business processes and user experience focused on digital networking and information sharing.
- Delivered digital profiles, portfolio presentation, social media integration, document sharing, and analytics capabilities.
- Presented the platform to potential clients, business partners, and decision-makers, built strategic partnerships, and directed continuous improvements based on user feedback and market needs.

- Lead freelance IT projects by managing planning, execution, and delivery while coordinating technical teams and stakeholders.
- Oversee task ownership, sprint execution, and progress tracking using Slack/Trello, ensuring scope, timelines, risks, and quality are effectively managed.

**Front end Developer / IT Project Manager / IT Project Coordinator**

**07/2024 - 04/2024**

**Project Management Systems**

- Support end-to-end IT project planning, execution, and delivery by translating business requirements into actionable technical tasks.
- Manage sprint planning, backlog prioritization, and user story preparation using Agile/Scrum methodologies.
- Maintain regular communication with internal and external stakeholders, ensuring visibility on progress, risks, and priorities.
- Coordinate cross-functional teams (frontend, backend, UI/UX) to ensure smooth execution and timely delivery.
- Prepare project status, performance, and progress reports for management and stakeholders.
- Developed the admin panel, implemented user roles and permissions, and optimized usability, integrating interactive charts and data tables to enhance system analytics and performance.

**Front end Developer**

**04/2024 to 08/2024**

**Buyur App**

- I developed the admin panel, implemented user roles and permissions, and optimized usability. I also integrated interactive charts and data tables to enhance system analytics and performance.

---

**Projects**

---

- **İnsyde – NFC & QR Digital Profile Platform (own product)**  
Founded and built the platform end-to-end: product vision, business model, system design, and implementation. Enables individuals and businesses to share contact details, portfolios, documents, and social media links through NFC and QR technologies.  
Owned the full delivery cycle as founder and product owner, from market research and feature prioritization to launch, client presentations, and post-launch improvements.
- **Project Management Systems & Melhem International Hospital**  
Led and coordinated the development of two large-scale digital platforms, overseeing feature planning, team task allocation, and stakeholder collaboration. Defined functional requirements, proposed improvements, and monitored implementation to ensure product quality and alignment with business objectives.  
Currently driving the development of new internal software solutions and digital products within the company to enhance workflow efficiency and innovation.
- **Enor Group, Salonbazari, MuseumInn, InvestHome, Indo, CoLink, CanubGas, Atelier di Falco, Aluhara, TACS, Azturk Package**  
Coordinated and delivered 35+ digital products and websites for clients across construction, retail, hospitality, real estate, energy, fashion, and consulting sectors.  
Managed requirement gathering, feature planning, and delivery; conducted client meetings, analyzed feedback, and converted business needs into actionable user stories. Managed product backlogs, led sprint activities, and ensured effective team collaboration and timely execution.
